

Intuitive Quantum Physics (IQP)

Indicates a research-demonstrated benefit

Overview

Tutorials for a course introducing non-science majors to basic ideas of quantum mechanics, including spectroscopy, simple molecules, and tunneling.

Level

Designed for: Intro College Conceptual

Can be adapted for: Upper-level Undergraduate, Graduate School

Setting

Designed for: Lecture - Large (30+ students) , Lab

Can be adapted for: Lecture - Small (<30 students), Studio

Coverage

Few topics with great depth

Topics

Modern / Quantum

Instructor Effort

High

Resource Needs

TAs / LAs, Advanced lab equipment, Tables for group work

Skills

Designed for: Conceptual understanding , Making real-world connections , Metacognition

Can be adapted for: Using multiple representations

Research Validation

Based on research into: theories of how students learn , student ideas about specific topics

Demonstrated to improve: conceptual understanding , beliefs and attitudes

Studied using: student interviews , classroom observations
